December 2 - 8, 2007

Methodology: Findings are based on December 2 - 8, 2007 survey of New York voters. The survey was conducted using an automated telephone dialer using the voice of a professional announcer, and online, where respondents used a login to access the survey.

The targeted-registration-based-sampling (TRBS)* selection criteria were based on election cycles and other voter factors in New York. Datamar proprietary algorithms were used to generate random samples from the target group for calling.

The margin of error for the total sample is +/- 4.1 percent at the 95 percent confidence level.

Where necessary, responses were weighted according to age, gender, and political party.
